GLF Partners With Comtech / Cogobuy for Asia Distribution

Santa Clara, CA.— May 12, 2016 — [GLF Integrated Power, Inc.](#), an emerging leader in efficient power switch technology, officially announces that it has entered into an Asian distribution partnership with Comtech, a fast-growing specialized electronic component distributor. GLF will begin listing its ultra-efficient I_QSmart™ load switch devices on [Cogobuy](#), an e-Commerce platform designed by Comtech to better reach their rapidly growing base of design engineers.

GLF offers analog power switch devices that lead the industry in critical efficiency specifications. The new GLF I_QSmart™ load switch devices, which offer best-in-class R_{ON}, I_Q and off-state leakage specifications, help designers of wearables, SSD modules, mobile devices, mobile medical devices and IOT products achieve improved product lifetimes and more efficient device operation.

“We have world-class products, and we are now working on building a world-class distribution network,” said Adrian Mikolajczak, COO and VP Marketing at GLF Integrated Power. “We’re excited to engage with Comtech and Cogobuy to sell our products. In an ever-changing industry, having a well-recognized, modern, and aggressive channel partner is key to the growth and expansion of our business.”

By adding GLF to its line card, Comtech now brings a new generation of ultra-efficiency load switch and power switch devices into its offering, further enhancing its leadership position in the field of electronic components distribution.

“As an industry-leading power switch manufacturer, GLF technology offers our customers’ best-in-class system efficiency, which allows them to achieve new levels of performance and battery lifetime,” said Henry Li, Senior Vice President from Comtech. “We are always looking to offer leading technologies to our customer base, so working with GLF is an excellent fit for us.”

About GLF Integrated Power

GLF Integrated Power, Inc. is a Silicon Valley, California, fabless semiconductor company. Founded in 2013, our goal is to help your wearables, mobile/portable devices, IOT products and SSD devices live longer and more efficient lives. We design breakthrough, ultra-efficient, ultra-small, silicon power control and protection ICs. We launched our first I_QSmart™, ultra-efficient load switch device to lead customers in 2015 and globally in 2016, and achieved immediate design wins at major wearable, SSD, and portable device manufacturers. About Comtech / Cogobuy

Headquartered in Shenzhen, Comtech, and its Cogobuy e-Commerce platform for electronic components, is dedicated to serving the electronics manufacturing industry in China. Comtech operates the largest transaction-based e-commerce platform for IC and other electronic components in China as measured by GMV in 2015 by fulfilling orders with a GMV of approximately RMB13.9 billion. Through Cogobuy's e-commerce platform, including a direct sales platform, an online marketplace and a dedicated team of technical consultants and professional sales representatives, the company provides customers with comprehensive online and offline services across pre-sale, sale, and post-sale stages. The company has built a large community of engineers and technical professionals who are able to contribute to the procurement decisions of electronics manufacturers. Additional information and access to Comtech's broad product offering is available at www.cogobuy.com.
